

VERTEX is a full service environmental and construction services firm globally recognized for our integrity and quality work. Since 1995, VERTEX has worked on over 22,000 projects totaling over \$1 billion. We proudly stand behind our first class work product and the expertise we bring to all areas of environmental and construction services, making us an asset on any project.

Marine Fisheries & Aquaculture Services

With our global expertise in compliance and environmental regulations, VERTEX Environmental Services supports government agencies and businesses in all industries from small to multi-national. Our expertise in all areas of the seafood supply chain enables us to offer technical and scientific services to evaluate and address risk from vessel to farm to market. We focus on ensuring compliance with corporate requirements and international norms. Through our Marine Fisheries and Aquaculture Division, VERTEX helps clients ensure operational compliance with corporate goals.

• VERTEX offers over two decades experience managing compliance certification, traceability and sustainability challenges from vessel to farm to market. We have advised on a number of legislative bills regulating seafood compliance, supply chain controls, certification and marketing. Our skilled fishery and aquaculture technical team is able to join with other partner organizations to support sustainable fishery projects. Through our international resource network, VERTEX supports multinational clients with premium quality service from qualified local experts who fully understand the regional culture, language and regulatory environment. VERTEX is recognized by many loyal Fortune 1000 clients for the excellent results we deliver.

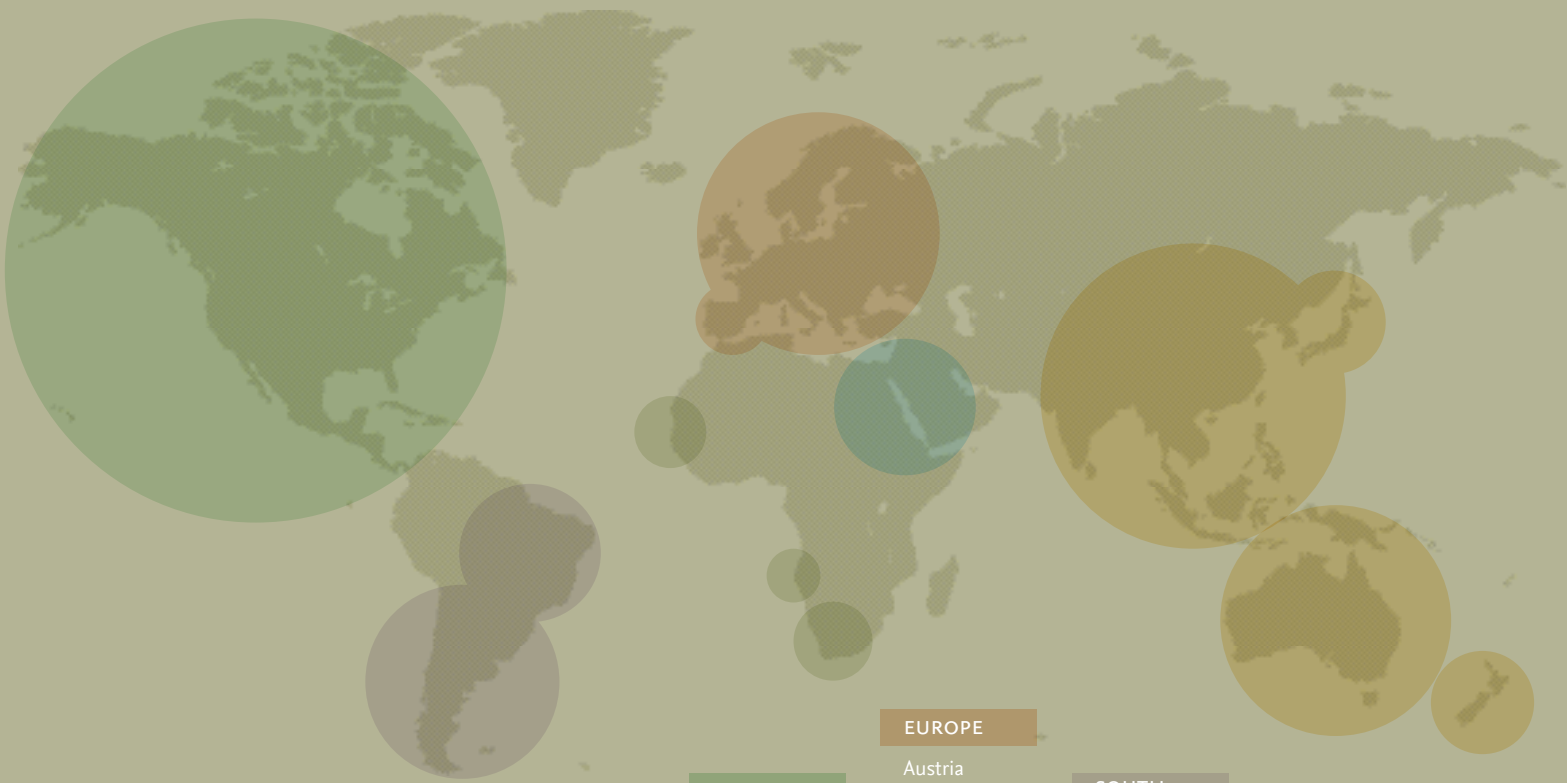

Services

- **Seafood Compliance:** Improvement project implementation and management, environmental, social, food safety, health and safety, product specifications, training and compliance systems implementation, international and domestic regulation.
- **Seafood Marketing:** Research and advisory, program development, certification application, and market strategy.
- **Economic Analysis:** Risk assessment and quantification, cost/benefit analysis, quantitative problem solving, scientific analysis, data collection and management.

- **Scientific Analysis:** Data collection and management, scientific monitoring, product testing, and eco-system analysis.
- **Seafood Traceability:** Assist fishing, aquaculture and seafood trade operators to protect confidentiality and link grounded government data into front-end traceability systems. Through the use of VERTEX's proprietary fishery database technology, we can efficiently link fishery data to various traceability systems retaining necessary confidentiality and data security for participants.

Our international network of resources enables us to provide our multi-national clients with the most qualified local professionals who understand the culture, language and regulatory system while maintaining the high quality service that VERTEX customers expect.
